## **REASON FOR ALLOWANCE**

1. Applicant filed a Terminal Disclaimer on 12/22/2010, linking this application, 10/563793 with copending application no. 10/614765. The Terminal Disclaimer was approved on 3/02/2011
2. Examiner finds applicant's amendments made on 9/22/2010 to independent claims 30, 35, 38 and 53, are sufficient to overcome the cited prior art of Herzberg et al. (EP 0717337) and Suzuki et al. (EP 0982725). The Examiner contends that the teachings of Herzberg and Suzuki do not teach applicant's newly amended claim limitation element of: "receiving data that includes the digital content, first data processing instructions, and second data processing instructions, the first data processing instructions being specific corresponding to the digital content and being executable by a computer language interpreter of the playback device to authenticate the second data processing instructions, the second data processing instructions being executable, by the computer language interpreter of the playback device, to request an access to a memory of the playback device". Dependent claims 31-34 depend on independent claim 30 and are therefore allowed. Dependent claims 36 and 37 depend on independent claim 35 and are therefore allowed. Dependent claim 39 depends on independent claim 38 and is therefore allowed.
3. Examiner finds applicant's amendments made on 9/22/2010 to independent claims 40, 46, 51 and 52 are sufficient to overcome the cited prior art of Kocher et al. (US Patent No. 6,289,455) and Suzuki et al. (EP 0982725). The Examiner contends that the teachings of Kocher and Suzuki do not teach applicant's newly amended claim limitation elements of: "receiving data that

includes digital content and first data processing instructions, the first data processing instructions being specific corresponding to the digital content and being executable by a computer language interpreter of the playback device to identify second data processing instructions that are executable by the playback device to affect playback of the digital content" and "initiate an execution of the second data processing instructions by the playback device to implement the software countermeasure associated with the security risk". Dependent claims 41-45 depend on independent claim 40 and are therefore allowed. Dependent claims 47-50 depend on independent claim 46 and are therefore allowed.

4. Examiner notes prior art reference Ripley (US Patent Publication No. 2002/0087871) and prior reference Kamperman (US Patent Publication No. 2002/0004903). Both references were obtained from an updated prior art search. The Examiner notes Ripley teaches a playback device operable to process a first and second instruction. The first and second instruction used for rendering media content. The Examiner contends that while Ripley performs a first and second instruction processing, Ripley's teachings do not disclose independent claims 30, 35, 38 and 53 claim element of "enabling the access by the computer language interpreter to the memory of the playback device, the access being performed by the computer language interpreter pursuant to execution of the second data processing instruction.". Additionally the Examiner notes that Ripley's teachings do not disclose applicant's claim limitation element of, "initiate an execution of the second data processing instructions by the playback device to implement the software countermeasure associated with the security risk" as disclosed in applicant's independent claims 40, 46, 51 and 52.

With regards to the teachings of prior art Kamperman, the Examiner contends that Kamperman discloses accessing memory content; the process of accessing being performed subsequent to an authentication of a received code using a one-way function. The Examiner notes however Kamperman teachings are silent with regards to applicant's independent claims 30, 35, 38 and 53 claim element of "receiving data that includes the digital content, first data processing instructions, and second data processing instructions, the first data processing instructions being specific to the digital content and being executable by a computer language interpreter of the playback device to authenticate the second data processing instructions". In Kamperman's system the player will receive a code and subsequently authenticate the code to render the playing of the content. Kamperman's system does not discloses receiving both a first and second instruction, the first instruction used to authenticate the second instruction. Additionally the Examiner notes that Ripley's teachings do not disclose applicant's claim limitation element of, "initiate an execution of the second data processing instructions by the playback device to implement the software countermeasure associated with the security risk" as disclosed in applicant's independent claims 40, 46, 51 and 52.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Accordingly, Claims 30-53 are allowed.
